**DETAILED ACTION**

***Application and Claims Status***

1. Applicant's preliminary amendments filed 10/14/2005 and 08/23/2006 are acknowledged and entered.
2. Claims 1-18 were pending. Applicants have amended claims 1 and 9; and added claims 19. No claims were cancelled. Therefore, claims 1-19 are currently pending and are under consideration in this Office Action. Additionally, in both the preliminary amendments filed 10/14/2005 and 08/23/2006 the instant specification is amended to include continuity information. It is also noted that the preliminary amendment filed 08/23/2008 is essentially a duplicate of the preliminary amendment filed 10/14/2005.

***Election/Restrictions***

3. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-8 and 19, is drawn to a display device.

Group II, claims 9-12, is drawn to an information processing system.

Group III, claims 13-18, is drawn to a display device driver circuit.

Art Unit: 2629

4. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical feature linking Groups I-III appears to be that they all relate to a display device driver circuit with a wireless input portion. This special technical feature is well known in the art. Moreover, Paulo (US Patent 6,703,926 B2) discloses a hand-held wireless control and display unit wherein the display unit a display driver circuit and a transceiver that receive both video and audio signals (see e.g. Abstract; col. 3, lines 8-30; fig. 1). Therefore, the technical feature linking Groups I-III does not constitute a special technical feature as defined by PCT Rule 13.2, as it does not define a contribution over the prior art.

5. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
